

Office Memorandum • UNITED STATES GOVERNMENT
DRAFT

TO : Deputy Director/Intelligence
Attention: Assistant to the DD/I (Planning)

DATE: 2 June 1956

FROM :

SUBJECT: Proposed Arrangements for OCI Exploitation of HTAUTOMAT

1. The Assistant Director, Current Intelligence, in providing for OCI utilization of HTAUTOMAT material, will establish a TALENT Control Center and impose the TALENT Control System in accordance with the TALENT Control System Manual.
2. The AD/CI will appoint a TALENT Control Officer to supervise the Office TALENT Control Center and to provide for Office exploitation of HTAUTOMAT and other TALENT material. The AD/CI will also appoint a TALENT Security Officer to be responsible to the AD/CI for insuring physical security and other standards required by the TALENT Control System.
3. The AD/CI will designate one person to represent the Office in liaison at the HTAUTOMAT Center.
4. The attached TAB "A" contains a preliminary list of OCI personnel requiring access to HTAUTOMAT material on a "Must Know" basis. The clearance of additional personnel will be required if the volume and nature of HTAUTOMAT material eventually requires special publication and processing efforts in OCI.
5. It is understood that the AD/CI will designate any additional OCI personnel for TALENT clearance and will certify the "Must Know" need for such clearances when the designations are made.
6. In regard to the proposed establishment of a CIA TALENT Utilization Board, it is recommended that a four-man committee, to be composed of representatives from ORR, OSI, OCI and DD/P, undertake to determine the mission of such a board, in order to permit determination of the eventual composition and functions of the board.
7. In the work of this committee, consideration of agency COMINT concerning utilization of COMINT will be helpful. DD/P's experience in sanitization and utilization of sensitive-source material will also be valuable.
